

Dr Hafid K. Al Daffaee, a chemist by formation with a postgraduate management diploma from England, has been mainly active as a consultant to oil refineries in the EU and the Middle East.

His area of expertise has been the trade of crude oil and oil products, with a specific focus on Diesel trading between major international buyers and refineries worldwide.

He also involved himself with the American Piping Products Inc. as their representative in Iraq, counselling the company in the supply of oil industries materials and equipment.

Dr Al Daffaee has held many lectures during his eleven years tenure at Coventry University on health related issues due to hazardous substances.
